Skills

TECHNICAL SKILLS:

- Python (intermediate level: object-oriented programming, file handling, data structures)
- Basics of algorithms
- Basics of SQL
- Basics of C++
- Basics of C
- Microsoft Office
- Use of AI tools
- Basics of HTML and CSS

SOFT SKILLS:

- Analytical thinking and quick learning of new technologies
- Conscientiousness, accuracy and responsibility in completing tasks
- Communicativeness and engagement
- Flexibility and punctuality

Languages

Polish	■■■■■■■ Native
English	■■■■■■■ Advanced (C1)
German	■■■ ■■■ Basic (A2)
Spanish	■■■ ■■■ Basic (A2)

Summary

I am a first-year Computer Science student at Warsaw University of Technology. Recently I completed the CS50x course, during which I developed my skills in building websites and in the C language, as well as working on algorithmic tasks. I bring a fresh perspective and a natural curiosity about new technologies, thanks to which I quickly absorb knowledge and am not afraid to ask questions where others might skip them. I am characterized by an analytical approach to problem-solving and consistency - whatever I start, I always see through to the end. I am ready to fully commit my enthusiasm and energy to the growth of the team I work with, treating every task as an opportunity to learn and to make a real contribution, even at an early stage of my career. I am looking for my first job in IT, where I will be able to gain experience, learn from the team, and also actively support it with new ideas and a willingness to act.

Education

10.2026 -
Present

Bachelor's degree: Computer Science
Warsaw University of Technology - Warsaw

09.2022 -
05.2026

*IV Liceum Ogólnokształcące z Oddziałami Integracyjnymi
im. Jana Pawła II w Jaśle*

Matura exam results:

- Extended Mathematics – 92%
- Extended English – 93%
- Extended Computer Science – 82%

Projects

Calculator (Python, PyQt5)

- Desktop application with a graphical user interface, supporting basic and advanced mathematical operations.

Digital Clock and Stopwatch (Python, PyQt5)

- Application with real-time timekeeping (QTimer), start/stop/reset functions, and time formatting.

Personal Portfolio (HTML, CSS, FLASK)

- My personal portfolio - <https://portfolio-4w5d.onrender.com/>

Experience

Construction assistant 07.2023 - 08.2023
Chicago, Illinois, USA 07.2024 - 08.2024

- Took part in finishing works on residential buildings, including the installation of doors, windows, and siding.
- Worked in a fully English-speaking environment, which allowed me to significantly develop my practical knowledge of English and my ability to communicate in an international team.
- Gained experience in physical work, team task organization, and working under time pressure on a construction site.
- A total of 3 months of professional experience gained over two consecutive summer seasons.

Certificates

CS50: Introduction to Computer Science | Harvard University - 09.2026
Barman/Kelner (Bartender/Waiter) - International Competence Verification Centre - 03.2026

Additional information

- Sanitary-epidemiological booklet (health record book for food-service work)
- Category B driving licence
